Build Your Own AI Assistant with UiPath API Workflow -A Conversational Result Checker

The screenshot shows a web portal for 'Results - End Semester Examinations - AM2026:: Phase-II'. It features a form with two input fields: 'Register Number' and 'Date of Birth' (with a 'dd-mm-yyyy' placeholder and a calendar icon). A 'SUBMIT' button is located at the bottom of the form.

VS

The screenshot shows a dark-themed conversational interface titled 'Preview'. It displays a greeting: 'Hello, I'm PSNA Result Assistant. Ask me about your exam results. I'll securely retrieve and present them in a clear and easy-to-read format.' Below this is a text input field with the placeholder 'Hi, what can you do?'. At the bottom, there is a larger text input field with the placeholder 'Talk with your agent...' and a 'Send' button (upward arrow). A small disclaimer at the bottom reads: 'Agents can make mistakes. Please double check the responses.'
