UiPath Community

LET'S BE HONEST FOR A SECOND

Why did YOU take admission in this college?

EXPECTATION

Semma package. Dream MNC.
Campus placement, done in 1 day.

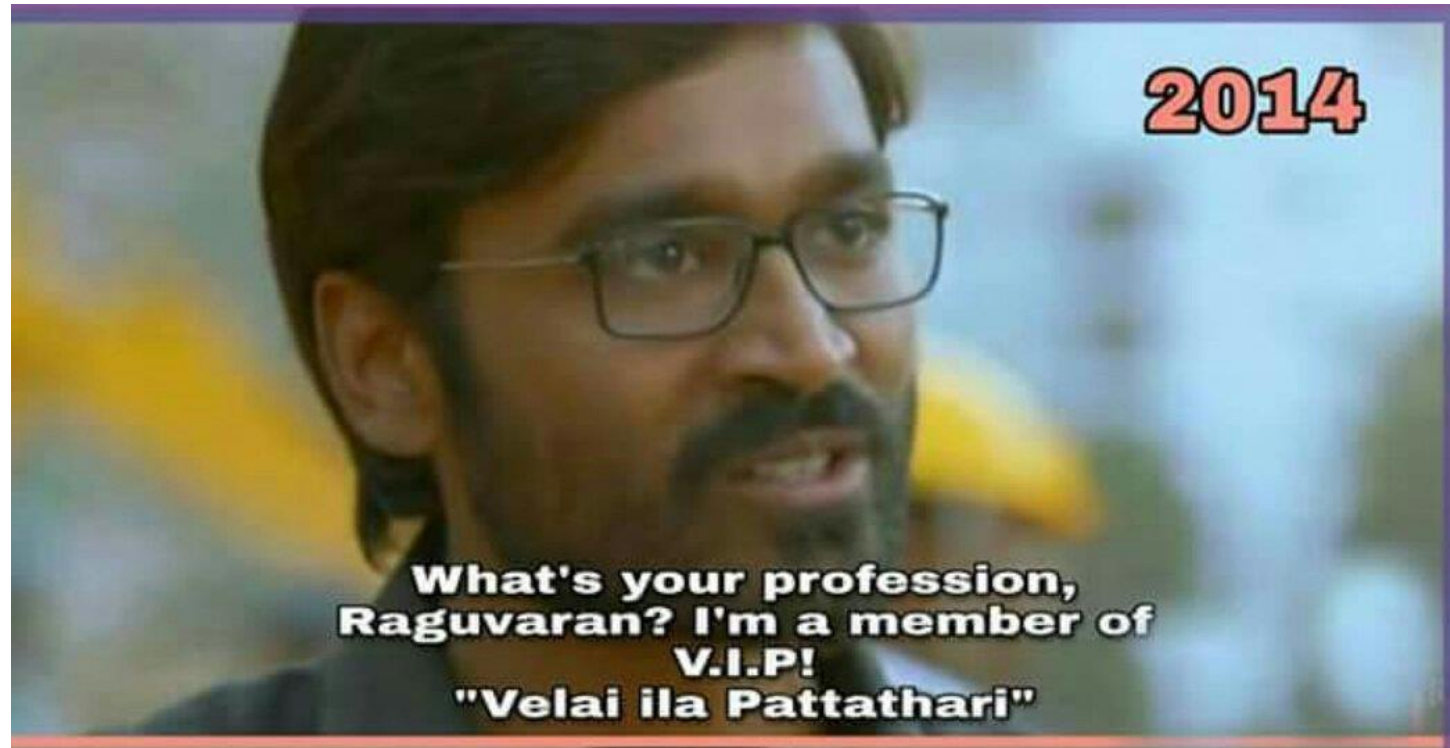

REALITY

47 rejections, 3 ghosted interviews,
Waiting for that 1 offer that actually matters

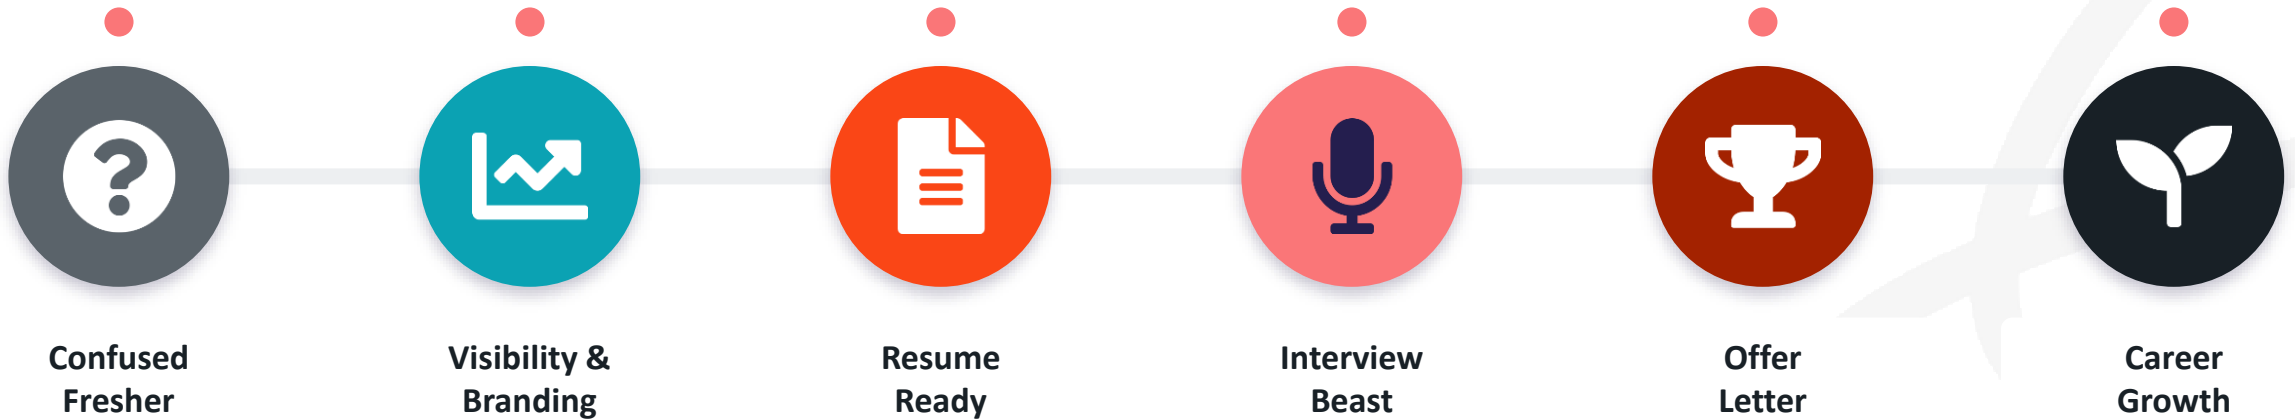

Campus To Corporate

LiDath Community

THE ROADMAP FOR TODAY

Your journey starts today

We'll walk this exact path today in this order. Bookmark this slide mentally; we'll come back to it.

ACT I

BUILD YOUR VISIBILITY

The quiet work that happens before the interview

What is seen, is sold

If nobody knows what you're building, it's as good as not building it. LinkedIn is your living resume; it works even while you sleep.

CANDIDATE A — Active & Visible

Posts projects, writes clearly, shows up in comments.
Gets noticed by recruiter searches. Referrals find her.

CANDIDATE B — Same Skill, Quiet

Equally skilled, never posts, never comments.
Misses the recruiter's radar completely — every time.

FAST QUIZ

True or False — rapid fire!

1. Consistency beats a 'perfect' profile.

2. Only IT companies ever check LinkedIn.

3. Small college projects aren't worth posting.

4. A thoughtful comment builds visibility too.

Do this. Not that.

DO

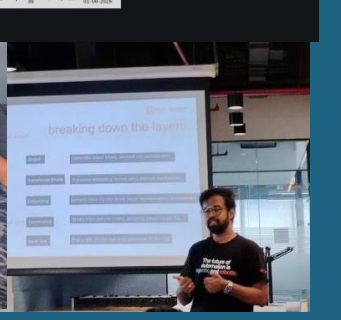

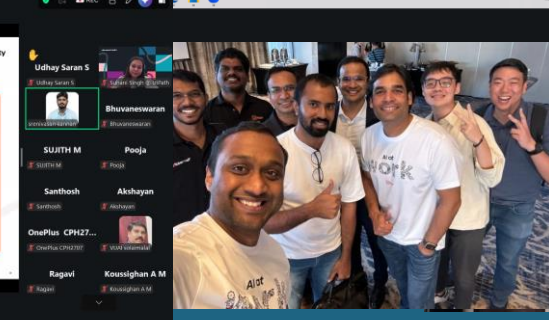

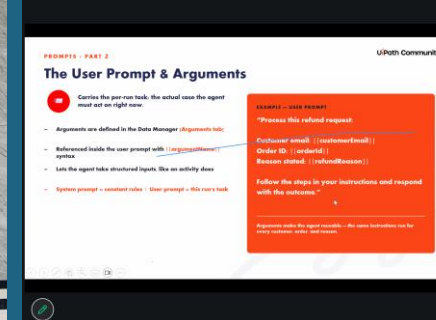

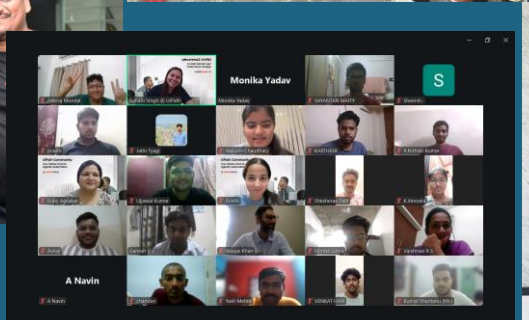

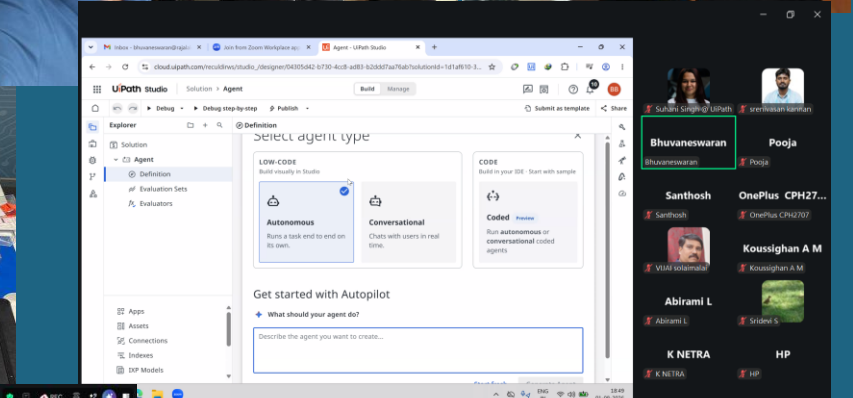

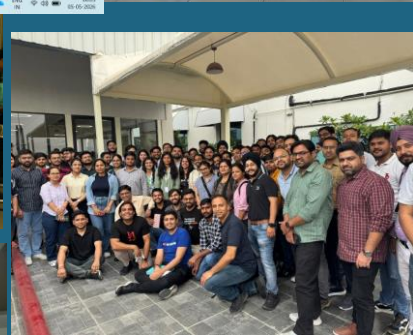

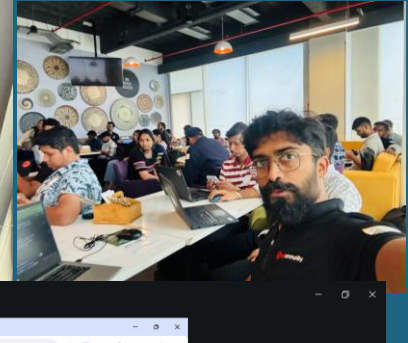

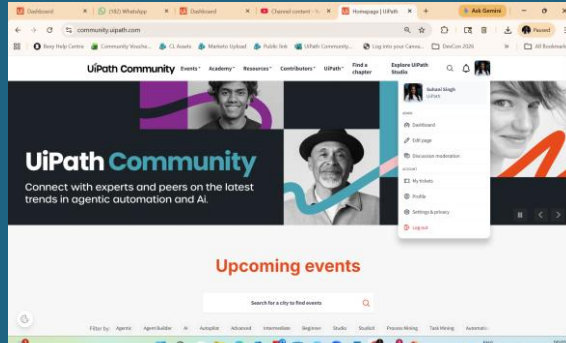

-  Post projects, certifications & takeaways
-  Write a clear, human 3-line headline
-  Comment thoughtfully on others' posts
-  Stay consistent — 2x a week is plenty

DON'T

-  Copy-paste generic 'excited to announce'
-  Leave your profile photo-less & blank
-  Post once, then vanish for months
-  List skills nobody can verify

Don't be this candidate: great skills, zero digital footprint.

ACT II

RESUME ULAGAM

Un oru-page ulagam — the page that opens every door

**Submitting a 3-page
resume**

**One-page resume,
instant shortlist!**

Supermeme.ai

The resume that got 10 seconds twice!

SHORTLISTED IN 10 SECONDS

Clean one-page format. Top line: “Automation intern, built 3 bots, saved 40 hrs/month.” No fluff, no objective paragraph — just proof.

Lesson: Numbers beat adjectives, every time.

REJECTED IN 10 SECONDS

Same skills, same CGPA. But 3 pages, a blurry photo, and a font that changed twice. HR's eyes gave up before the achievements did.

Lesson: Format is not decoration. It's respect for HR's time.

ATS decoded — beat the bot first

What is ATS?

Applicant Tracking System — the software that reads your resume before any human does. No fancy format survives it.

Use standard headings (Experience, Skills)

Skip tables, text boxes & graphics

Mirror exact keywords from the JD

Save and send as a PDF

Interview-ku preparation panna vendiyadhu idhu — start with the resume.

THE ESSENTIALS

A good resume, in six moves

One clean, consistent format

Numbers beat adjectives, always

Punchy summary — 3 lines max

Never lie — it always surfaces

Match keywords to the JD

One page. Every single time.

Mass resume ≠ Long resume. Semma resume = Sharp resume.

Why resumes get rejected

Typos, Grammar Slips

One typo = one doubt about your attention.

No Real Numbers

"Improved performance" means nothing.

Generic Objective

"Seeking a challenging role" — deleted.

Not ATS-Friendly

Tables & graphics confuse the scanner.

Irrelevant to JD

Same resume, every company? Red flag.

Unprofessional Email

cutiepie123@ does not scream 'hire me.'

Sample Resumes Format:

EDUCATION

KIET Group Of Institutions <i>Bachelor of Technology in Computer Science and Information Technology</i>	Oct. 2023 – May 2027 SGPA – 8.67
Aryaman Vikram Birla Institute <i>Higher Secondary Education</i>	Aug. 2022 – March 2023 Percentage – 93

EXPERIENCE

Triply Play Store <i>React Native Intern</i>	Jan 2026 – Present
- Built and deployed a group travel management mobile application on Google Play Store using Expo, TypeScript, and SpringBoot, implementing end-to-end AES-256 encryption ensuring data privacy. - Engineered an offline-first system with SQLite local caching and optimistic UI updates via TanStack Query enabling real-time sync across unreliable network conditions. - Developed a conversational trip-planning agent that automated itinerary generation, streamlining group management and enhancing the user planning experience.	

PROJECTS

EZpensify GitHub	Nov 2025 – Jan 2026
- Built a full-stack Expo finance app supporting stock portfolio monitoring, expense tracking, and real-time P&L insights with optimized API performance (200ms). - Implemented EMI, SIP, and tax calculators with amortization schedules and financial projections for smarter budgeting and investment planning. - Developed secure REST APIs using Express.js and PostgreSQL with JWT authentication, rate limiting, and modular TypeScript architecture.	
MiniLab (React Native) GitHub	June – Aug 2025
- Developed a modular cross-platform mobile application implementing navigation, state management, API integration, gestures, animations, audio, and haptics. - Built feature-driven modules including Paint Canvas, Dice Game (haptics), Currency Converter (API), Music Player, and Password Generator. - Designed a clean, production-ready UI with structured architecture, loading/error handling, and reusable components.	

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, C, C++, Kotlin
Frameworks: React Native (Expo), Express.js, React, Node.js
Developer Tools: GitHub, Git, VS Code, Postman, Figma, Supabase

ACHIEVEMENTS

UiPath Student Developer Champion	2025 – Present
Patent Recipient for Project Suryamukhi	April 2025
2x National Hackathon Winner	2024 – 2025

POSITION OF RESPONSIBILITY

Core Android, Innogeeks <i>KIET Group of Institutions</i>	Aug 2025 – Present
- Mentoring 35+ juniors in Android development, guiding them through projects and best practices. - Managing club operations and leading teams while organizing technical events and workshops. - Led 3+ national-level hackathons and facilitated participation in 5+ hackathons, improving engagement by 40%.	

SRISHTI SHARMA

Raipur, India | +91 9826077944 | srishtishm794@gmail.com
LinkedIn | Github

TECHNICAL SKILLS

AI / ML: AI, ML, Computer Vision, LLM, Statsmodel, Transformers, Data visualisation, Agentic AI
Programming Languages: Python, C, C++
Libraries & Frameworks: Numpy, Pandas, Seaborn, Matplotlib, Plotly, Scikit-learn, BeautifulSoup, Selenium, Arima, Langchain, Langgraph
Tools & Platforms: Git, VS Code, Streamlit, UiPath (RPA Automation)

WORK EXPERIENCE

Artificial Intelligence Intern Infosys	Dec 2024 – Mar 2025
- Led a team of 4 engineers as PoD lead to design and deploy a real-time e-commerce competitive intelligence platform covering pricing analysis, sentiment analysis, and customer behavior prediction. - Built web scraping pipelines using BeautifulSoup & Selenium to collect live data from Amazon and Flipkart. - Implemented AI-driven sentiment analysis models using Hugging Face Transformers, achieving a 40% improvement in personalized product recommendations and a 25% reduction in customer churn rate.	
Artificial Intelligence Intern Edunet Foundation (AICTE)	Feb 2025 – Mar 2025
- Developed an AI-powered Resume Screening and Candidate Ranking System using Python, NLP, and machine learning to automate and streamline end-to-end recruitment workflows. - Implemented TF-IDF vectorization and Cosine Similarity algorithms to match candidate profiles with job descriptions, significantly enhancing hiring efficiency and accuracy.	

Community and leadership (UiPath)

2024 – Present

AI & Automation Speaker: Delivering sessions, conducting quiz and hackathons on RPA, Agentic AI, and automation workflows via simplified concepts into practical use cases for students and beginners.
UiPath Student Champion: Promoting RPA and AI adoption through peer learning and community initiatives in our local chapter.

PROJECTS

ER Assist – RPA & Agentic AI – Emergency Room Support Automation UiPath	LINK
- Designed and deployed an end-to-end Agentic AI workflow using UiPath Orchestrator, Storage Buckets, and Action Center to fully automate patient intake and priority triage in emergency room settings. - Reduced doctor intervention latency by 80% through intelligent human-in-the-loop approvals and AI-driven decision support, directly improving patient outcomes	
HerHealth AI – Women's Health Management Platform Python, ML	LINK
Segmented users using Gaussian Mixture Models & Hierarchical Clustering for personalized healthcare recommendations.	
ResQAI – Disaster Response System Python, ML, Data Analytics	LINK
Developed a disaster response system using Python, ML models, and data analytics to analyze crisis data and predict high-impact zones and streamline relief distribution.	

EDUCATION

Bachelor of Computer Applications (BCA) ICFAI University, Raipur	Aug 2023 – Aug 2026 CGPA: 10.0
--	-----------------------------------

ADDITIONAL INFORMATION

- Certifications:** Oracle GenAI Professional, Data Science & Architect Associate Certified
- UiPath Agentic Automation Associate (AAA), Automation Developer Associate(ADA) trained.**
- Winner of Agenthack India 2025 by UiPath among 600+ teams nationally.**
- Winner, Reserve Bank of India RBI 90 Quiz (State Level) out of 12000+ state registrations.**
- Nationwide Finalist in 6+ hackathons and 10+ case competitions.**

ACT III

THE SELECTION GAUNTLET

Aptitude, group discussion, and interview rounds

Raise your hand if interviews scare you.

Idhu dhaan reality — and that's exactly why you're here.

 Never attended one yet

 Attended one, froze completely

 Attended a few, kinda confident

 Already have an offer in hand

Four rounds stand between you and the offer

Resume
Shortlist

Aptitude
Test

Group
Discussion

Interview
Tech + HR

Disclaimer: Go through your university's placement rules thoroughly — and start trying for off-campus jobs in parallel.

Aptitude test & group discussion — fast tips

APTITUDE TEST

Know the syllabus cold

Focus on basics, not shortcuts

Build speed & accuracy daily

Stay in practice mode, always

GROUP DISCUSSION

It's a discussion, not a debate

Give space, then add real value

Start or conclude if you can

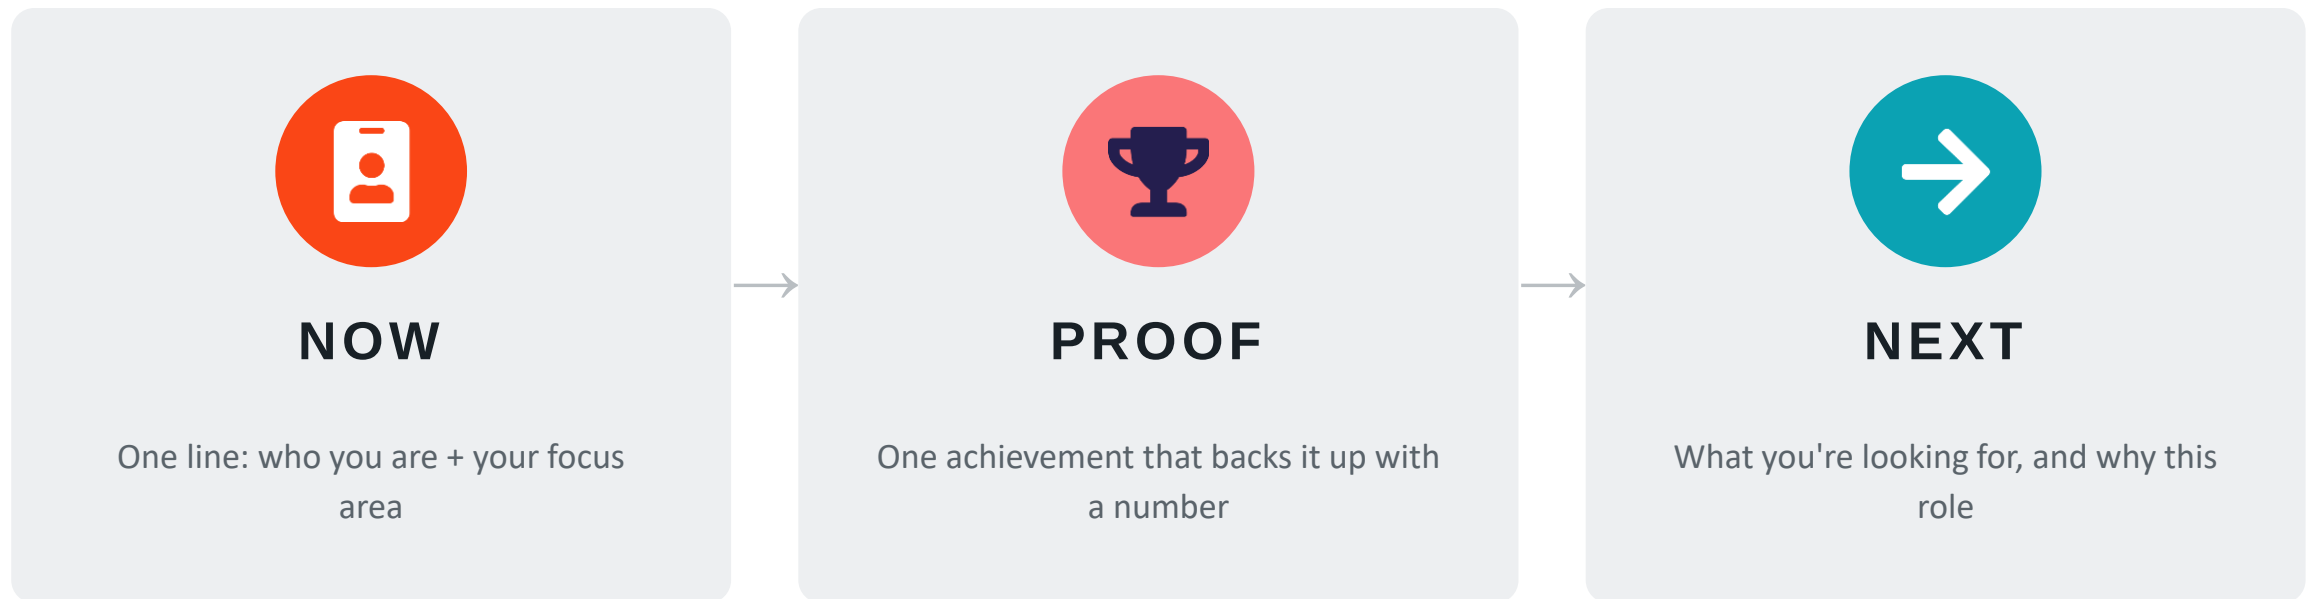

Body language speaks before you do

GDs aren't won by the loudest voice — they're won by the clearest one.

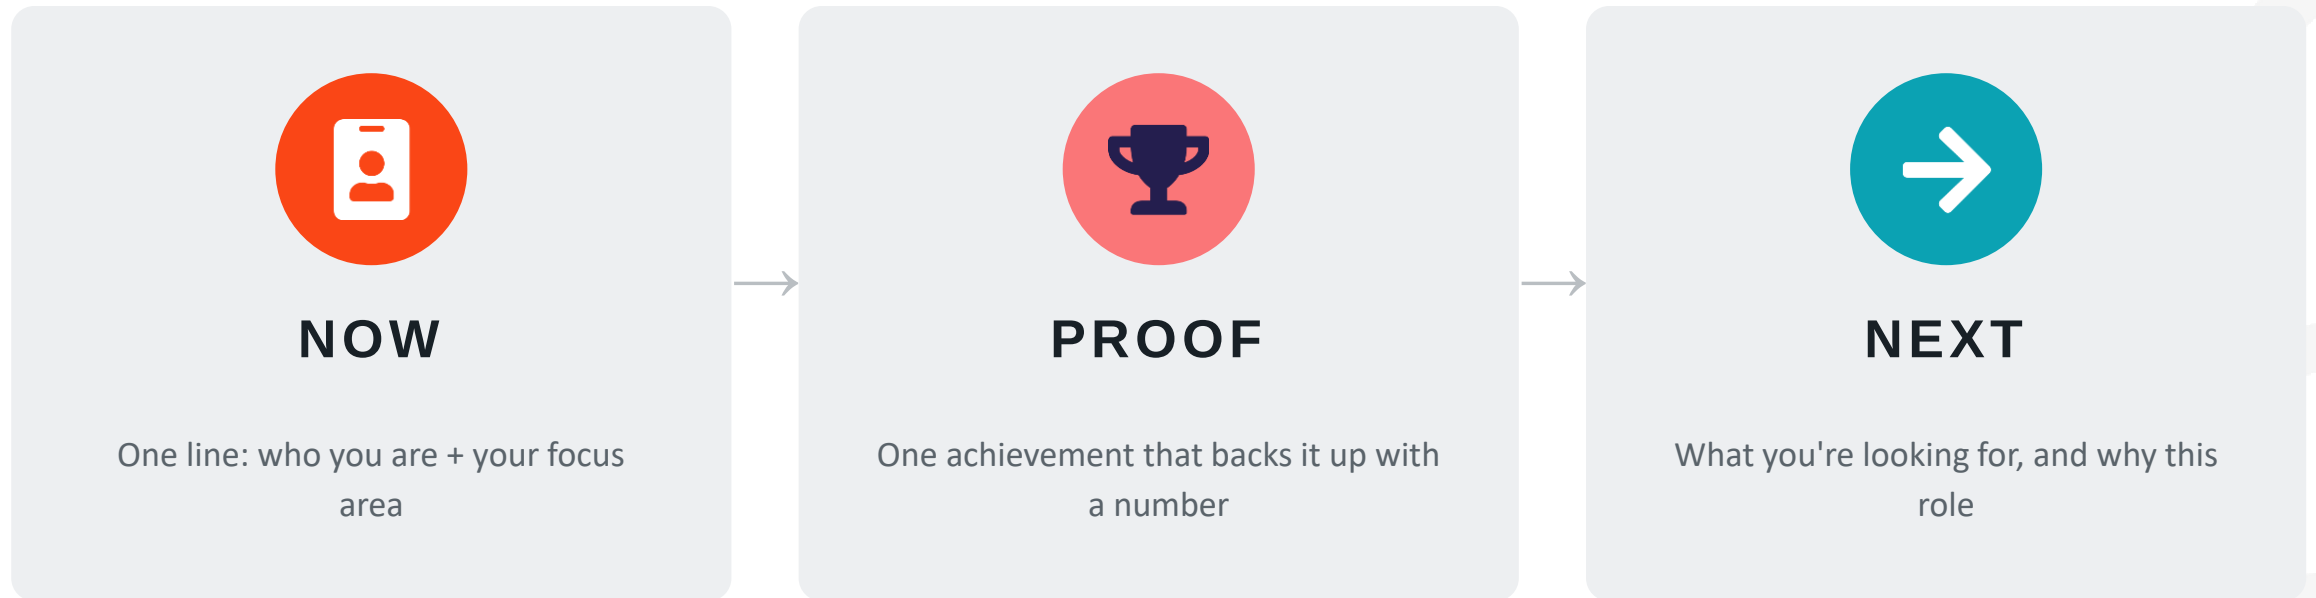

“Tell me about yourself” — the formula

Keep it under 90 seconds. This is a trailer, not the whole movie.

Practice it live — 60 seconds each

Turn to your neighbour. 60 seconds each. Ready — go!

Interview mistakes that cost real offers

Rambling, No Structure

Long answers without a clear point.

Badmouthing the Past

Trashing your college or old team? Noted.

No Questions Back

Shows zero curiosity about the role.

Overconfidence

Bluffing tech answers backfires fast.

Weak Handshake

Small thing, big first impression.

Checking Your Phone

Even once. Even 'just the time.'

"I don't know" VS
"Here's how I'd
approach it"

Three smart moves that set you apart

Ask the Recruiter

“What does success look like in 90 days?”

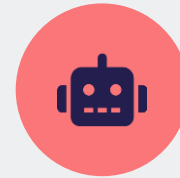

“How is performance reviewed here?”

Email Etiquette

Clear subject line,
no slang

Reply within 24 hours,
always

ACT IV

BEYOND CAMPUS

Off-campus jobs and the power of network

Off-campus jobs & the power of network

APPLY & TRACK

LinkedIn, Internshala, Indeed — daily

Track company career pages directly

Show hunger — follow up, don't ghost

NETWORK WITH INTENT

Friends, seniors & alumni already know people

A warm referral beats a cold application

Ask directly: “Can you refer me?” works

Semma opportunity often comes through people, not portals. Ask for the referral.

Top 10 placement secrets, in one slide

1

Numbers beat adjectives on paper

2

Visibility beats hidden talent

3

First 30 seconds count the most

4

GD is won by clarity, not volume

5

Now → Proof → Next, always

6

Curiosity is currency — ask questions

7

Small things create big impressions

8

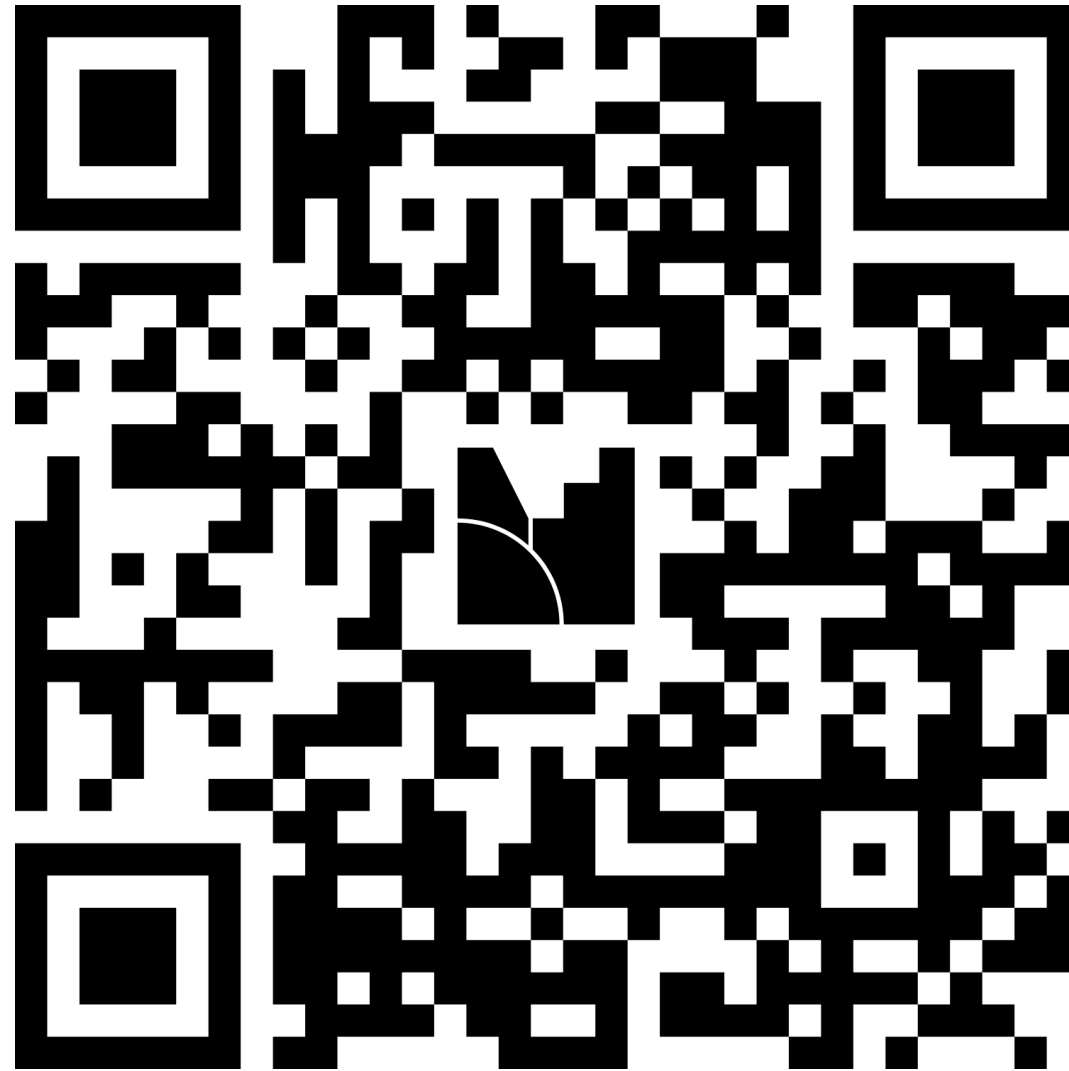

Referrals move faster than portals

9

Consistency beats one-time effort

10

Professionalism never clocks off

BACK TO THE ROADMAP
